

Mikron - Measurement Lab

Mikron Measurement Lab was founded in 2003. Our technical staff has over 10 years of experience in modeling of measurement tools. Our high competence are also supported by many certificates. Our clients are dozen companies - from biggest names known on the market for years for small businesses. Our main target is to give 100% satisfaction to the clients by securing they measurement needs in modeling. Mikron is a small lab and it's functioning according to PN-EN ISO/IEC 17025:2005 norm. Our biggest trumps are:

- low prices
 - short period of order implementation
- Low prices lets our clients to tailor they supervision of apparatus to they real needs results from the character of the firm. Short period of order implementation means minimalizing the travails which are connected with metrology task limits when the devices are out.
